Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-5 and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Aasted (US 5,635,230).

Aasted discloses a water-soluble package 20 containing a fluid substance 22 with a dome shaped body portion; see figure 6a. The first sheet of thermoformed water soluble material 21' is connected with the second sheet of thermoformed water-soluble material 23, which forms a base wall. The base wall is generally flat of a circular/oval shape. The dimensions (width/height ratio) seem to fall in the range of claim 2.

Art Unit: 3721

3. Claims 1 and 5-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Dickler et al. (US 6,037,319).

Dickler et al. discloses water-soluble packets containing liquid cleaning concentrates comprising "two sheets, sealed together at the edge regions...preferably, by heat sealing." (column 3, lines 27-30).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dickler et al. (US 6,037,319).

Dickler et al. discloses the claimed invention except for height/width ratios as described in claim 2. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate such ratios, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Allen*, 105 USPQ 233.

6. Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dickler et al. (US 6,037,319).

Dickler et al. does not specifically disclose a circular or oval shaped base. However, it would have been an obvious matter of design choice to include a package with a generally circular or oval shaped base since applicant has not disclosed that a circular design solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with its described dimensions.

Response to Arguments

7. Applicant's arguments filed 7/16/02 have been fully considered but they are not persuasive. Aasted discloses forming shells/packages using molds for a tempered fat-containing mass (ie. chocolate) and cooling it in order to form the package. Thus the chocolate sheets 21, 21', and 23 (figure 6a) are subject to heat and subsequent cooling or "thermoforming".

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R Harmon whose telephone number is 703-308-8643. The examiner can normally be reached on Monday-Thursday from 8-6.
